The Cancer Epidemiology Program at Fred Hutchinson Cancer Research Center is offering a post-doctoral fellowship opportunity in geospatial analysis under the supervision of Dr. Margaret Madeleine, Associate Member in the Cancer Epidemiology Program. The fellowship will focus on geospatial analyses of HPV vaccine data. The successful applicant will have the opportunity to pursue independent research and publications in addition to the main project for this fellowship, in research areas such as HPV-attributable cancer epidemiology, HPV vaccine immunoepidemiology, and immunogenetics of HPV-related cancers. Opportunities to conduct geospatial research with other faculty members at the Fred Hutch in related areas, such as colorectal cancer screening or environmental exposure assessment may also be available.

We are seeking highly-motivated applicants (PhD/ScD in Epidemiology, Biostatistics, or related field) with outstanding training and experience in epidemiological methods and geospatial measures. While HPV-related diseases are the focus of our group, individuals with interests in related conditions and risk factors with an emphasis on geospatial measures are welcome to apply. Applicants are expected to have excellent writing skills and will be expected to conceive and execute creative new uses of study data. We also encourage and support attendance at scientific conferences and participation in study leadership meetings with collaborating research groups. Applications should be submitted to https://careers-fhcrc.icims.com/jobs/13217/post-doctoral-research-fellow%2c-geospatial-epidemiology/job. Review of applications will continue until the position is filled.

The Cancer Epidemiology Program is part of the Fred Hutch’s Division of Public Health Sciences, home of an extensive portfolio of population science research, large specimen and data repositories, a SEER cancer registry, a prevention center designed for intervention research and a multidisciplinary faculty. The Fred Hutch, together with the University of Washington, Seattle Children’s and the Seattle Cancer Care Alliance, is an NCI-designated Comprehensive Cancer Center with training programs for graduate students and postdoctoral fellows.

We are committed to cultivating a workplace in which diverse perspectives and experiences are welcomed and respected. We are proud to be an Equal Opportunity and VEVRAA Employer. We do not discriminate on the basis of race, color, religion, creed, ancestry, national origin, sex, age, disability, marital or veteran status, sexual orientation, gender identity, political ideology, or membership in any other legally protected class. We are an Affirmative Action employer. We encourage individuals with diverse backgrounds to apply and desire priority referrals of protected veterans. If due to a disability you need assistance/and or a reasonable accommodation during the application or recruiting process, please send a request to our Employee Services Center at escmail@fredhutch.org or by calling 206-667-4700.
